

SRCA ARCHITECTURAL APPLICATION CHECKLIST

Artificial Turf

Synthetic turf may be installed in the front and rear yards as a substitute for natural turf lawns. Turf in the rear yard, unless visible lakeside, does not require Architectural Committee review. Review may be allowed on a staff level, pending review of the specifics of the proposal.

This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please contact our Architectural Liaison for additional information.

Please submit the following, in addition to your SRCA Architectural Application for SRCA review:

- Product data and sample of artificial turf, including product weight. *Turf under 70 oz. is not permitted.*

- Color photo of front or lakeside yard, with all areas to be replaced (as far back as possible).

- Aerial plan of location to be replaced, including square footage.
