

SRCA ARCHITECTURAL APPLICATION CHECKLIST

Awnings, Security Shutters and Wrought Iron Window Barriers

Overhead screens, shade covers, awnings, patio roofs, and other similar structures require review and approval prior to installation and shall be constructed of materials and color to match or complement the main house or roof. Awnings should be a minimum of five (5) feet from the property line and the shape, color and material must be compatible with the design character of the residence. All structures of this type will be reviewed on a case-by-case basis.

This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please contact our Architectural Liaison for additional information.

Please submit the following, in addition to your SRCA Architectural Application for SRCA review:

- Full color house photo with proposed location(s) noted, including installation heights.
- Plans with measurements, style and color(s), material sample and hardware description.
