

SRCA ARCHITECTURAL APPLICATION CHECKLIST

Courtyard Walls

Installation of any courtyard walls, regardless of height, require Architectural Committee review and approval prior to installation.

This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please contact our Architectural Liaison for additional information.

Please submit the following, in addition to your SRCA Architectural Application for SRCA review:

- Full plans to include a front elevation drawing to include setbacks and wall heights.
- Measurements of existing wall structures to remain, if applicable.
- Measurements of proposed new walls (distance from property line, height, length & width etc.) To include popout/cap measurements and details.
- Detail of wall cap, if applicable.
- Color photo of entire front of house (as seen from across the street).
- All material samples and paint color(s) to be use.
- Location of accent stone/tile, if applicable.
- Stone/tile product information and sample, if applicable.
- Exact gate plans (all measurements, material description or sample, screen & color), if applicable. If proposed gate is to be wood, additional photos of all other wood accents (existing gates, doors, trim etc.) will be required.
- Exact light fixtures to be added (number, location, wattage, color & style).
- Pot(s) color and size, if applicable.
- Any wrought accent details (color & material).
- Walkway/Patio size and material sample.
