

## SRCA ARCHITECTURAL APPLICATION CHECKLIST

### Dock

All dock modifications require review and approval prior to installation. If the dock proposal conforms to the standard dock detail approved for SRCA, review may be allowed on a staff level, pending review of the specifics of the proposal. New docks require Architectural Committee review and approval prior to installation.

**This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please contact our Architectural Liaison for additional information.**

**Please submit the following, in addition to your SRCA Architectural Application for SRCA review:**

- Photo of existing dock, if applicable.
- Measurement of distance from neighboring property line(s) on both sides.
- Measurements of new dock.
- Plans/drawings of new dock (if different/changes from current) to include how dock will be cantilevered so as to not be attached in any way to the lake liner.
- Material being used & color (color brochure is acceptable).
- Detail of any lighting, benches, ornamentation, kayak racks, etc.
