

SRCA ARCHITECTURAL APPLICATION CHECKLIST

Flagpole

All permanent flagpoles and their locations must be reviewed and approved by the Architectural Committee prior to installation. This type of installation requires neighbor disclosure; please allow additional time for review. *Only one (1) flagpole is permitted per residence.*

This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please contact our Architectural Liaison for additional information.

Please submit the following, in addition to your SRCA Architectural Application for SRCA review:

- Pole height, color and details on illumination. Poles are not permitted to be higher than the roof height. Flagpoles must be made of metal and must be factory finished in black, bronze, white, satin aluminum or clear.
- Full house photo showing exact location of flagpole including an aerial photo.
- Distance from all property lines, including setback from the lake.
