

SRCA ARCHITECTURAL APPLICATION CHECKLIST

Rain Gutters

Scuppers, gutters and downspouts must be integral to the building design and require review and approval prior to installation. Scuppers, gutters and downspouts must match the abutting surface.

This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please contact our Architectural Liaison for additional information.

Please submit the following, in addition to your SRCA Architectural Application for SRCA review:

- Full color house photo where gutters will be located (as far back as possible).
- Product detail (size & type, etc.)
- Color – (SRCA requires gutters be painted to match existing color of the abutting surface if the factory color does not match existing structure).
- Down spout /drainage details and location(s).
