

SRCA ARCHITECTURAL APPLICATION CHECKLIST

Stucco Changes

Stucco finish modifications are allowed and may be reviewed and approved on a staff level, as long as the requested finish is approved for the subdivision and the entire home is to be modified. All other requests would require Architectural Committee review and approval prior to installation. Please allow additional time for review.

This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please contact our Architectural Liaison for additional information.

Please submit the following, in addition to your SRCA Architectural Application for SRCA review:

- Color photo of house (as seen from across the street).
- Stucco sample/type.
- Proposed color. Proposed paint and integrated color stucco must adhere to the approved color palettes in place at the time of installation. For additional information, contact our Architectural Liaison.
