

SRCA ARCHITECTURAL APPLICATION CHECKLIST

Security Doors/Screens

Please be sure your project meets any guidelines before submitting for approval.

Installation of all security doors or screens, in the front, sides or the rear of the home require review and approval prior to installation. Dependent upon the type of installation and design, review and approval may be allowed on a staff level.

This checklist is for guidance ONLY-please refer to the SRCA Architectural Guidelines for the specific requirements relating to your project. You may require additional checklists, dependent upon the type of project proposed. Please see plan my project for more information at www.scottsdaleranch.org. Full guidelines/applicable architectural rules are available at <https://www.scottsdaleranch.org/plan-my-project-architectural-guide/>

In order to create and maintain harmony and consistency within a property, when choosing materials and finishes (for walls, fences, gates, landscaping, driveways, walkways, and hardscape elements), having a large number of different materials, textures, or designs is to be avoided. The Architectural Committee reserves the right to deny applications which would result in too many different materials, textures, or designs being visible.

Please submit the following, in addition to your completed and signed SRCA Architectural Application for SRCA review:

- Photo of existing doors/screens.
- Photo of the front of the home, from as far back as possible showing how the color will blend with existing gates and fences.
- A completed architectural application to include exact style, color, material and hardware description. Please provide plans, including dimensions for custom designs.
